

## I CLAIM:

1. A peeler cover for a kitchen knife comprised of a body of the cover and a protection clamp; two frames each in a length half of that of a blade being respectively provided on both sides of the blade closed in the cover at the middles section of the cover; a window being formed between both frames to expose the blade inserted into the cover; a finish slot for peeling being deflected from where between the blade and the frame edge in front of the blade; the protection clamp provided flush over the exposed blade being related to a screening member given with mild restoration capacity of elasticity; and both wings of the protection clamp being respectively extended vertically to cover the exposed blade and the finish slot is characterized by that with the knife in the cover with the blade facing upward or downward depending on the left-hander or a right-hand user and with the protection clamp being removed to forthwith function as a peeler.
2. A peeler cover for a kitchen knife as claimed in Claim 1, wherein, those two frames further extend towards the other end of the finish slot.
3. A peeler cover for a kitchen knife as claimed in Claim 1, wherein, a

locking point is each provided extending from the outer edge of the frame.

4. A peeler cover for a kitchen knife as claimed in Claim 1, wherein, a ventilation hole is provided at where close to the tip of the cover.
